EXPERIENCE

Intern Scholarship student (Software Engineering)

TIB - Leibniz-Informationszentrum Technik und Naturwissenschaften und Universitätsbibliothek, Germany

📅 January 2024 – December 2025

- Focus on Human-Computer Interaction (HCI) research for scholarly communication.
- Developing a multi-modal food search and food assistant system.
- Augmenting Large Language Models (LLMs) with food knowledge from the Open Research Knowledge Graph (ORKG) to provide relevant nutritional information.

Co-chair

SemTab@ISWC Challenge

📅 January 2025 – November 2025

- Co-organized the SemTab challenge at ISWC, an international benchmark for semantic table annotation
- Designed evaluation tasks and performance metrics for the SecuTable dataset
- Contributed to the construction and curation of the SecuTable benchmark dataset
- Led the evaluation process and analyzed system performance
- Contributed to the writing of the challenge report and dissemination of results
- Challenge link: <https://sem-tab-challenge.github.io/2025/>

FullStack Developer Certification

Udacity

📅 July 2022 – November 2023

- API design with Flask.
- Database management with PostgreSQL.
- UI design with ReactJS.
- Continuous integration and delivery using AWS, Kubernetes, Docker.

PROJECTS

TSOTSA

TSOTSA Project

📅 since 2025

- Lead the development of tsotsa: Food Information engineering platform
- Link: <https://tsotsa.org>

EDUCATION

PROFILE SUMMARY

I am a PhD student at TIB – Leibniz Information Centre for Science and Technology and Leibniz University of Hannover, working under the supervision of Prof. Dr. Sören Auer and Dr. Azanzi Jiomekong. My doctoral research project, entitled “Neuro-Symbolic Organization of Scientific Knowledge,” focuses on combining artificial intelligence and knowledge graph technologies to improve the organization, accessibility, and reuse of scientific knowledge. My work contributes to developing intelligent systems and interfaces that support researchers in exploring, structuring, and interacting with scholarly knowledge within modern digital research infrastructures.

SKILLS

AI Technologies

Llama, Sklearn, Transformers, Peft, SFT, BERT

Programming Languages

Python, Javascript (Es6), HTML, CSS

Frontend Development

ReactJS, Bootstrap, Scss

Backend Development

Django, Flask, FastAPI

Mobile Development

React Native, Expo

Databases

Postgresql, MySQL, SQLite

Containerization / DevOps

Docker, AWS, Google Cloud, Kubernetes, CI/CD

Software Modeling / ERP

UML, Odoo

Code Management / Methodology

Git, Github, Gitlab, HuggingFace, Scrum

Master in Computer Science

Option: Information System and Software Engineering

September 2023 – October 2025 University of Yaounde I

Bachelor in Computer Science

Option: Information System and Software Engineering

September 2019 – June 2022 University of Yaounde I

AWARDS

IBM Research Award

ISWC Conference (Semtab Challenge)

2024

- Awarded for the top performant system at Semtab@Accuracy track.
- Awarded for the top performant system at Semtab@STI&LLM track.

SCIENTIFIC PUBLICATIONS

Fair Access for Food Data in Africa: An approach based on Retrieval Augmented Generation

Since 2025

Leveraging GPT Models For Semantic Annotation

Since 2024

LANGUAGES

French (Native)

English (Fluent)
